JUSTFAB®

MEASURMENT CHART

WHAT'S YOUR SIZE?

Here's how you find out!

1. Print out this chart (duh, right?)
2. Take off your shoes and socks.
3. Stand up and put your bare foot on the chart.
4. Measure yourself! If you're wide width, your foot falls on or past the grey lines.

REGULAR

Our standard B fit. Designed with regular room across the footbed, ball of the foot and instep.

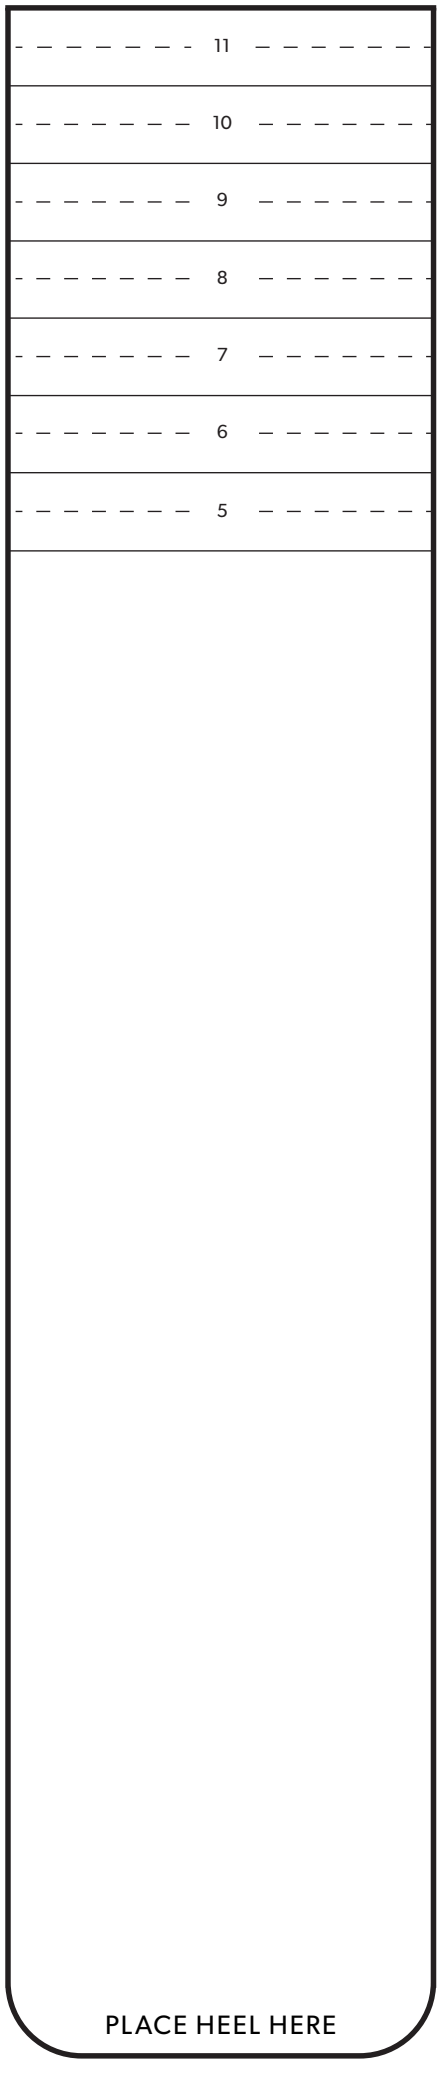
WIDE WIDTH

Designed with extra room across the footbed, ball of the foot and instep (about .5" additional width). Wide width boots also feature around 2" more in the calf circumference.

Print this page on 8.5" x 11" paper at 100% full size (do not shrink, scale or fit)

Place a credit card here to make sure it fits in the space

You are wide width if your foot touches this line.



Wide Width - Widest part of your foot falls here
